

Billing Information

Our policy is any co-pays, deductibles, or other non-covered charges are to be paid *prior* to your procedure date.

- Our office will contact your insurance company to *estimate* what amount is due before surgery (this is ONLY an estimate).
- We will then contact you to schedule your procedure and inform you of the amount due prior to surgery.

This process can take up to two weeks.

After your procedure, our office will submit a claim to your insurance company for Dr. Orgill's services.

You will receive a separate bill from the facility and the anesthesiologist.

Understanding Your Bill

As you prepare for your surgery, we want to make sure you understand how you will be billed for the services you receive. **At a minimum, you will receive three separate bills.** Because government and insurance rules do not permit us to bill or collect money for other offices, each office must send you a separate bill and collect payment from you individually.

We realize that these multiple bills can be confusing. Our staff will do their very best to help you with questions and guide you to the proper sources of information. If you have any questions about this information, please contact the billing office at 405-605-4368, option 5.

Here is an explanation of the bills you will receive:

PHYSICIAN BILL

You will receive a bill from us for what is known as the physician's fee. This fee is for the services performed by Dr. Orgill. Any payments received from you and your insurance will already be reflected in your balance due.

FACILITY BILL

Your surgery will be performed at a facility chosen by you and Dr. Orgill. Since Dr. Orgill is not an employee of the facility, they will bill you separately. The facility's bill will be sent from the facility's billing office. You must address all questions and send all payments to that office.

ANESTHESIA BILL

The anesthesia you receive during your surgery will be provided by the anesthesiologist and/or a certified registered nurse anesthetist. The anesthesia staff will give you either sedation or general anesthesia and will monitor you throughout the surgery. You will receive a separate bill for these services. You must address all questions regarding these services and send all payments to that group or physician.
